

Alireza Aslani

Front-End React.js Developer

with over 2 years of experience in Front-End Development. Passionate about clean code, reusability, technical decisions and following best practices. I focus not only on delivering results but also on building solid project foundations and creating real value.

PROJECTS

Full-Stack | Financial Dashboard | 17 Aug 2025 – Present

[Github](#)

- **Skills** : Next.js, Typescript, MUI, React-Query, Mongoose, JWT, React-Hook-Form, Zod, Nuqs.
- **Features** : Fully MUI financial-panel with advanced transaction filtering, multi-account switching, automated calculations for daily financial management, And secure login system with OTP.
- **Experience** : Pre-render some pages on the server to improve SEO, modularized TypeScript codebase to enhance type safety, developed entire backend and auth system, used React-Query on server to consider data flow between SSR and CSR and keep data caching benefit, safe database queries with sessions, built a transaction filtering system with Nuqs and ContextAPI to ensure stable and shareable state

Front-End | Educational Website | Feb 2025 – Jun 2025

[Github](#) | [Demo](#)

- **Skills** : React.js, TailwindCSS, React-Query, React-Hook-Form, Zod, Framer Motion, Data Router.
- **Features** : A dynamic e-learning platform with server-driven articles, structured programming courses (free & premium sessions), user authentication, personal dashboard, and a support ticket system.
- **Experience** : Read Back-End developer's documentation, used React Query to reduce request count, manage states with ContextAPI to avoid prop drilling, optimize performance using code-splitting and preloading strategies to improve Lighthouse score from ~50 to ~99, storage Auth token in user's client, used hooks to separate responsibilities And used Zod and React-Hook-Form to consider form-states and submitting validations.

EXPERIENCE

[Avatsanat](#) - A company focused on smart automation systems for amusement parks.

Front-End Developer | 17 Dec 2024 – 26 Dec 2024 | Part-Time

[Github](#) | [Demo](#)

- Refactored and modernized 5 static pages, improving visual consistency across the site.
- Rebuilt the layout foundation using TailwindCSS, reducing CSS size and repetitive style.
- Implemented Swiper.js and ScrollReveal.js to enhance UI transitions, resulting in smoother interactions and a more engaging user experience.
- Configured a custom Tailwind setup aligned with the company's existing theme, ensuring brand consistency.
- **Tech Stack**: HTML, TailwindCSS, Javascript, Scrollreveal.js, Swiper.js
